TABLELANDS OWN AERIAL AGRICULTURAL SPECIALISTS

2 April 2014

To whom it may concern,

Re: Aerial Agricultural Activities and the proposed Mount Emerald wind farm

I would like to take this opportunity to state that;

- the developers of the proposed Mount Emerald wind farm have undertaken consultation with me and made me aware of the perceived issues and impacts the project may have
- at this time, I am comfortable the Mount Emerald Wind Farm will not negatively impact our ability to continue to safely operate in and around the traditional areas in which we have previously serviced our customers and there should be no negative impact to the new farming developments within these areas

Yours faithfully

Hamish Jacob
Owner / Chief Pilot
